

BRUNNA PAJANOTI

- **GEOLOGIST AND MASTER'S DEGREE IN GEOSCIENCES**
- **QUALIFIED PROFESSIONAL MINERAL EXPLORATION BY CBRR (BRAZILIAN RESOURCES AND RESERVES COMMISSION)**

Worked on laterite nickel projects, taking on the Geology coordination of the research and mineral exploration disciplines of Projects in southern Pará. Expertise in the research phases for the evaluation of mineral resources, involving database consolidation, QAQC, due diligence, contribution to resource and mineral reserve certification reports, in accordance with international codes, team management and contract management.

Experience in gold projects in underground and open pit mines, supervision of research and exploration campaigns, implementing processes and procedures in the company to consolidate data and declare the exploratory potential of deposits.

ACADEMIC EDUCATION

Master in Regional Geology and Mineral Resources

Federal University of Mato Grosso
2011 - 2013

Bachelor in Geology

Federal University of Mato Grosso
2006 - 2010

Business Management Technologist

University of Cuiabá - UNIC
2007 - 2008

PROFESSIONAL

● SENIOR GEOLOGIST

Harpia Gold

March 2023 - Current

Supervision of medium and short drilling campaigns, sample quality control plans, standardization of sampling procedures and coresheds. Definition of drilling plan for mining front. Technical responsible for mineral exploration targets. Preparation and training of operational procedures for the team. Contract management.

● GEOLOGY COORDINATOR

Horizonte Minerals Plc.

Oct 2021 - Oct 2022

Coordination of the geology, field and geotechnics team with support for contractors, contract management and measurements. Responsible for short-term drilling and open pit pre-strip for lateritic nickel. Support for mine opening infrastructure and earthmoving activities. Coordination and execution of the geotechnical survey plan for the foundation of a cooling dam. Multidisciplinary engagement in the areas of geology, operations, environment and social in the pre-feasibility and feasibility study phases. Audit participation.

● GEOLOGIST

Horizonte Minerals Plc.

Feb 2003 - Oct 2021

Diamond drilling monitoring, description of core drilling, sampling, quality control and standardization of coreshed activities. Control of areas and regional mapping for reports to competent bodies, environmental studies and monitoring to meet conditions and EIA/RIMA, Pre-Feasibility and Feasibility studies. Engagement and follow-up meetings with stakeholders and communities to monitor mining activities in the Southeast Pará.

● GEOLOGIST

Cougar Metals NI.

Aug 2011 - Nov 2012

Monitoring of drilling campaigns to control mining front content, mapping of underground galleries to delimit the mineralized body. Monitoring of processing gold ore in gravity and leaching plants. Execution of survey campaigns and mapping of regional targets and research reports.

COURSES

- Training for Micromine Origin & Beyond – 2023
- Hydrogeology Applied to Mining - FUNEP/MDGEO - 2021
- Mine Geotechnics Course - Instituto Minere – 2021
- QA/QC Course Applied to Mineral Prospecting and Exploration - Instituto Minere –2019
- Integrated interpretation ISO 14001:2015 and ISO 45001:2018 - SGS Academy –2018
