About us

**MORE THAN
CONSULTANCY!**

ABOUT US

ECTerra Brasil is the local partner of ECTerra, a company founded in 2008 in Germany, specialized in project development from grass roots exploration through to production. Since its foundation, ECTerra brings together a number of professionals from various disciplines including exploration geology, mining operations, geotechnics, environment, health and safety, finance, community relations and social development.

The company provides project management services with a philosophy of value for money to the client. Starting with a project concept, a project development plan is produced, the necessary skills required are sourced from within the ECTerra/ECTerra Brasil team or from our wide ranging network. Finally, the project plan is implemented by our team seconded into your company/project, this 'hands on' approach ensures that your project gets the direct benefit of our input, skills and time.

ECTerra has successfully delivered projects for more than 35 clients, working in over 28 countries worldwide, such as Albania, Australia, Bosnia & Herzegovina, Botswana, Brazil, Cameroon, Canada, China, DRC, France, Germany, Ghana, Greece, Kosovo, Liberia, Mauretania, Mozambique, Nigeria, Philippines, Russia, Serbia, South Africa, Sri Lanka, Tajikistan, Turkey, Uganda & UK. ECTerra Brasil builds upon this international experience to deliver tailored solutions within Brazil.

THE BRAZIL TEAM

Considering ECTerra's accumulated experience in Brazil, it is now strengthening its local presence through a partnership with the newly created ECTerra Brasil. Our network of Brazilian experts covers a wide range of project tasks, from exploration project management and PFS & FS studies to environmental and licensing challenges.

This combination allows us to deliver technical excellence, local compliance, and sustainable solutions, ensuring that projects in Brazil benefit both from international know-how and local expertise.

GEOLOGY, MINING AND EXPLORATION SERVICES

A team of experts in geology, mining and exploration.

ECTerra Brasil promotes the application of the highest environmental and social standards in mining worldwide and its further development, in particular under the aspects of the CO₂ minimization and environmental protection. We are also committed to the implementation of geo-ethical guidelines in industry, science and education as well as the implementation of the sustainable development goals (SDGs), with focus on:
